

AGENCY:

Mississippi Department of Marine Resources

MODEL:

Draganflyer X6

YEAR OF COA:

2011

STATUS:

Expired

LOCATION:

30°26'32.69" N 88°37'19.22" W elev 0 ft

Mississippi

DESCRIPTION OF USE:

To perform very low-level photo reconnaissance in uninhabited open marsh areas. The purpose of the flights would be to aid in early detection of new populations of a federally listed noxious weed, giant salvinia (*Salvinia Molesta*) that has become increasingly problematic in the South, producing significant harm to the environment and economy.
