

174th COA – 2

Emergency Procedures

Point of Contact:

[REDACTED]
[REDACTED]

Exemption 6

In the event of an emergency, the RPA operator will notify ATC and advise of the nature of the emergency, intentions with the aircraft, and ask for any assistance as required. The RPA PIC will maintain aircraft control, analyze the situation, apply the appropriate corrective procedures IAW Technical Orders, and recover the aircraft to KGTB in a timely manner.

During all MQ-9 operations by the 174FW there will be a pilot-qualified Supervisor of Fling (SOF) on duty at KGTB whose duties involve assisting the PIC with all technical and command-and-control aspects of emergencies. This individual will assist ATC, the PIC, and any/all other agencies to coordinate for safe recovery of the aircraft.
